SKILLS

Development

C# 
SQL 
HTML5, CSS3 

Operating systems

Windows 
Mac OS 

Framework

ASP/.NET Core 
Entity Framework 
Dapper 

Database

SQL Server 
MySQL 

Methods

Agile / Scrum 
SOLID principle 
Design Patterns 

Tools

Visual Studio 
Git 
Jenkins 
Swagger 

PROFESSIONAL EXPERIENCE

Independent Developer

Full Stack .NET Portfolio

2026

- Development of a showcase site to present my experiences and achievements.
- Design of REST APIs and technical architecture.
- Data persistence management and performance optimization.

Technical environment:

C#, .NET, ASP.NET Core, Blazor, Entity Framework Core, SQLite, GIT.

Mobile Gaming

- Gameplay and technical architecture design.
- Development of core features and user interfaces.
- Managing data persistence and optimizing performance.

Technical environment:

Unity, C#, Git.

ASTEK – Service Desk

Application Maintenance

January / September
2024

- Participation in the development of business applications for several clients.
- Analysis of the functionalities.
- Development of new features.
- Corrective maintenance and evolution
- REST API development.
- Performing unit and functional tests.
- Participation in code reviews.
- Application deployment.
- Writing of technical documents.

Technical environment:

C#, .NET, ASP.NET Core, SQL Server, GIT, Docker, Azure DevOps, Scrum.

Euro Information - IT Advisor

Web service for deploying
cognitive solutions.

January 2023/2024

- Redesign of a web service allowing the deployment of the group's cognitive solutions.
- Migration of the application to a private cloud infrastructure to improve availability and maintainability.
- Development and adaptation of REST services to new infrastructure standards.
- Participation in the configuration of deployment environments.
- Ensure compatibility with specific cloud standards and protocols.
- Scaling and optimizing performance after migration.
- Maintenance and evolution and correction of the platform.

Technical environment:

C#, .NET, ASP.NET Core, SQL Server, Entity Framework, REST API, Git, Docker, Jenkins, Visual Studio.

Electronic signature web service.

March 2022/2023

- Contribution to the evolution of a signature service used in a banking environment.
- Study and Integration of a new electronic signature provider.
- Analysis of functional and technical needs in collaboration with the business teams.
- Development and optimization of services and API processing.
- Monitoring of the development cycle and coordination of the project.
- Technology monitoring of EI processes and tools.

Technical environment:

C#, .NET, ASP.NET Core, SQL Server, Dapper, REST API, Git, Visual Studio, and VS Code.

Paragon ID - Apprentice Information Systems Managers

NFT card print management
software
(S-Printbox).

June 2018/2021

- Participation in the development and evolution of a business application dedicated to print management and card personalization.
- Analysis of customer needs and participation in the design of functional developments.
- Development of new functionality and corrective and scalable maintenance.
